PROJECTS

Neighborhood Map — *Github Link*

Built a google maps web app using HTML/Javascript. Used knockout to implement filtering and interactivity. Uses Eventful and Foursquare APIs to provide user with additional information.

Frogger Clone — *Github Link*

Built a frogger clone using Javascript, used prototypes heavily to implement the characters.

Memory Game — *Github Link*

Built the Javascript for a memory card web app, used JQuery to traverse and manipulate the DOM.

EDUCATION

- **Udacity**
  - *Intro to Programming Nanodegree*
  - *Front End Web Developer Nanodegree*

Feb 2017 - Oct 2017

Project based nanodegree programs that taught me a lot about responsive web design and gave me a solid foundation of Javascript knowledge and some experience with JS frameworks(backbone, knockout, jQuery).

- **Edx**
  - *Harvard-CS50* ∘ *MIT-6.001x*

Oct 2017 - Nov 2017

Courses with focus on computer science fundamentals like data structures and algorithms. Languages covered C, JS, Python, SQL

- **Wes Bos**
  - *Es6 for Everyone* ○ *React for Beginners* ○ *JavaScript30*

Nov 2017 - Dec 2017

Project based online courses focusing on maintaining a solid grasp of JS best practices and exploring modern frameworks.

SKILLS

Javascript
  - jQuery
  - es6
  - React

HTML

CSS

Python

C

Git
